

Are you d/Deaf, hard of hearing, a family member, or professional who works with people who are d/Deaf and hard of hearing?

If so, we would like to hear from you!

The COVID-19 pandemic has impacted many aspects of our lives. This study aims to explore how it has specifically impacted communication for individuals who are d/Deaf and hard of hearing, as well as those who interact with them on a daily basis. This study is open to individuals who use either spoken English and/or American Sign Language. ASL Interpretation for study materials is available upon request.

We invite you to complete an [online survey](#), which should take approximately twenty minutes to complete, to help us learn more about how COVID-19 has impacted communication in your daily lives. Thank you for your consideration!
